Allowable Subject Matter

1. Claims 1, 4-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art does not teach that, a vehicle safety system comprising a controller coupled to said at least one beam-forming assembly and said at least one object detection sensor; and a memory coupled to said controller and operable to store a plurality of setectable beam patterns; wherein said controller is operable to change at least one said beam illumination pattern emitted from at least one said emitter in response to at least one said object detection signal by adjusting at least one beam illumination parameter selected from the group consisting of beam amplitude, beam location, beam focus, beam angle, and beam shape in combination with all limitations recited in independent claim 1 (claims 4-18 are allowed, since they are dependent on claim 1).

Prior art does not teach that, a headlight system for vehicle, the headlight system comprising the controller is operable to control at least one said beam-forming assembly so as to configure light received from at least one said light source for emission via at least one said emitter to thereby produce at least one beam illumination pattern for enhancing visibility of a roadway; wherein each said beam illumination pattern has associated beam illumination parameters including beam angle, beam focus, beam amplitude, beam position, and beam shape; and wherein said controller is operable to change at least one said beam illumination pattern in response to said second

Art Unit: 2821

communication signal by adjusting at least one of said beam illumination parameters recited in independent claim 9.

Prior art does not teach that, a method of operating a headlight system on vehicle for adaptively illuminating a roadway to enhance visibility, the method comprising the steps of: a controlling said headlight system to selectively produce a beam illumination pattern that illuminates said roadway.; detecting at least one communication signal generated from at least one object that is external to the vehicle; controlling the headlight system, in response to and in accordance with each the communication signal, to selectively alter its beam illumination pattern by adjusting at least one beam illumination parameter selected from the group consisting of beam angle, beam focus, beam amplitude, beam position, and beam shape recited in independent claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
